

FIFTH ANNUAL
CALIFORNIA CAPITAL AIRSHOW
MATHER AIRPORT • SEPTEMBER 11-12, 2010

Dave Sullivan (AKA Planebender)

Dave Sullivan (AKA Planebender) has been "building" and flying Radio Control (RC) planes for over 20 years. He is a sponsored 3D pilot with companies like Duralite Batteries, Chief Aircraft, and Pace American Cargo Trailers backing him.

The difference is truly in the details that Dave puts into each and every plane. Anyone can slap an Almost Ready to Fly (ARF) plane together but not Dave. Each plane is given his meticulous time and energy rendering a true show plane as the end result. The final product is a plane perfectly balanced, ready for the first turn of the prop. With years of competitive 3D flying and pylon racing, Dave knows all the tricks required to make each and every plane fly true and straight. The install of radio equipment is nothing short of perfection. Each ARF Dave turns out is truly a handcrafted work of art.
